---

AKA John Riley. I'm a Software Engineer for a robotics firm in Binghamton, NY (25 years).

I specialize in real-time O/S's and real-time control programming.

I also manage an engineering web on the corporate intranet. I'm looking at using tikiwiki instead of static web pages at work.

Most of my development experience is in PDP-11 assembly, C and Perl. (Also some Forth, Tcl, and C++)
