Hi,

I'm exploring Tikiwiki and try to install it on a free pipni.cz with only ftp access.

Some thing is now working. You are welcome on my hobby page www.dingo.sk, sorry this time only in slovak. (terrible sorry tikiwiki is not working on pipni.cz) I'd like to make it multilanguage (eng, sk,hu,de). (I had not find hungarian translation.)

On tikiwiki.dingo.sk I'd like make slovak Tikiwiki.

Tikiwiki is super, terrific, it's nearly a "information machine" from my childhood dream.

Best Regards and thanks for all authors
