Hi,

I'm exploring Tikiwiki and try to install it on a free [pipni.cz](http://pipni.cz) with only ftp access.

Some thing is now working. You are welcome on my hobby page [www.dingo.sk](http://www.dingo.sk), sorry this time only in slovak. (terrible sorry tikiwiki is not working on pipni.cz) I'd like to make it multilanguage (eng, sk,hu,de). (I had not find hungarian translation.)

On [tikiwiki.dingo.sk](http://tikiwiki.dingo.sk) I'd like make slovak Tikiwiki.

Tikiwiki is super, terrific, it's nearly a "information machine" from my childhood dream.

Best Regards and thanks for all authors
