

UserPageLucasdeskywalker

My name is Dave and I am building a wiki with my partner called [Sarasota Wiki](#). We are hosting at ServerFly. After checking out as many wikis as possible, we chose to go with Tikiwiki. Tikiwiki is so far out in front of anything else, it's a fairly easy decision to make, if you have the technical wherewithal to install and manage your own dedicated Web server.

Anyway, I thought I should at least introduce myself here and talk about how I found my way to TikiWiki. Keep your eyes/browsers peeled for [Sarasota Wiki](#).
