- Java
- Maven
- MySQL
- Oracle
- Perl
- PhotoShop CC
- PHP
- Python
- Subversion
- TFS
- TomCat
- Websphere v8
- XML

Contributions to TikiWiki

I am a Tikiwiki project admin and admin of de.tiki.org

Tiki Modifications

- 'access code' for anti-script-user-generation improved
- Added support for Atom output feeds, details see http://bitworking.org/rfc/draft-gregorio-07.html
- Added support for external Atom feeds, just add them on the rss feeds page!
- feature_wikiwords switch for enabling/disabling WikiWord
- german translation (ongoing)
- many bugfixes
- method 'generate password' improved (php and js version)
- module ModuleLastActions
- module ModuleLastImages
- module ModuleLastImagesTh
- open/close folder icons for menus
- plugin {RSS(id=>feedId,max=>5,date=>1,desc=>1,author=>1)}{RSS}: PluginRss
- plugin CATEGORY (basic version, improved by others): PluginCategoryDev
- plugin SORT: PluginSort
- RSSModules enhanced RSSModulesDev, RSSModulesDoc
- RSS: New 'refresh' button on admin page for external rss feeds
- security fix for RSS feeds (only get feeds for objects you are allowed to view)
- security fix for search box (only search in pages you are allowed to view)
- spec conformity fix for RSS feeds, stylesheet for RSS, added support for rss 2.0: RssFeedDev,

RssFeedDoc
- themes 'olive', 'olive_red', 'olive_blue'

- fixed Forums : individual RSS feeds not working
- fixed RSS not properly processing blogId
- fixed FANCYTABLE plugin generates wrong TD format
- fixed RSS feeds are sent with Wiki Formatting instead of HTML
- fixed RSS feed brakes in 1.8 RC3 - httprequest() in tikilib didnt return any data.
- fixed RSS feeds : Display bullets out of page
- fixed HTML enabled wiki pages : Capital <TABLE> causes many lines
- fixed Search: user input not checked for unwanted chars

Other work

- providing Tiki XRef, Tikidoc and Doxygen documentation on https://de.tiki.org/
- building archives with latest svn content (fix release and HEAD), see same url
