Multi level menus using PhpLayers: MultiLevelMenus

---

January 27 2005

Changing )):(( in the menus to + and - as in this site: ChangingMenuOpenClosetoPlusMinus

---

October 4 2003

I've started creating flash movies on how to do admin settings in tikiwiki w/ a hope that they will be helpful for newbies. The link to their list is [here](#). Good to see dgd joinning in this project.

---

October 5 2003

I am providing a java applet that can be used to chat in #tikiwiki channel of IRC. Those who don't/can't use a IRC client can utilize this for a general wikitiki talk. Note that it is not a help channel and you should not demand or complain that no one is helping you. That said, it doesn't mean others (try to) help if you have a question or two and if they are in a mood to. IRC is a privilege, not a right. [Enjoy](#). Just enter a nickname and hit 'Connect'.
