

WikiList

General Description

In Wiki pages and other contexts that support Wiki formatting (including articles, forums, and blogs), you can easily create bulleted, numbered, and definition lists. In numbered lists, Tiki numbers the items automatically. You can also create nested lists.

Quick reference

*	Bulleted list
#	Numbered list
<i>;term:definition</i>	Definition list

Tip If you forget which character to use while you're editing, click the **Wiki Quick Help** tab

- For more detailed instructions, see [WikiListDoc](#).

Key Function and sub-features

- Enables users to create bulleted, numbered, and definition lists in Article, Blog, Forum, and Wiki pages
- In numbered lists, items are automatically numbered
- Bulleted lists are formatted (like this one) with neatly indented turnover lines
- Numbered and bulleted lists can be nested
 - Here's a nested item
 - And here's another one
- Definition lists show the defined term flush left, while the definition is neatly indented

Typical Uses

- Bulleted lists: Use whenever you'd like to list items of equal importance.
- Numbered lists: Use for instructions (step-by-step) or items of decreasing importance.
- Definition lists: Use for glossaries of terms.
