## Tiki Releases 9.0

Rick - 27 Jun 2012 10:46 GMT-0000

The Tiki Community is proud to announce the release of **Tiki 9.0**, the latest  version of Tiki Wiki CMS Groupware. This release, with more than 1,000 code contributions by dozens of Tiki Community members, includes many new features, some architectural enhancements, and many bug fixes.

Some of these new features include:

- Improved batch actions based on a URL with a token access.
- Extensive improvements to the Maps, Slideshow, Calendar, File Gallery and Drawings
- New plugins and modules
- Introduction of Timesheet functionality
- The Smarty template engine was updated to 3.1.x
- and much more!

Refer to http://doc.tiki.org/Tiki9 and the Tiki 9.0 Release Notes for details.

As is the tradition in the Tiki community, most of the *.tiki.org sites have been upgraded to 9.x **before** it was officially released. This helps find and fix bugs. Please see: tw:Dogfood.

The release of Tiki 9.0 marks the close of the Tiki 8.x branch. All Tiki Administrators using an 8.x version are encouraged to upgrade to Tiki 9.0. Tiki 9.x is a LTS (Long Term Support) version, and it will be supported until November 2015.

The Tiki community has also decided to extend long term support (LTS) for Tiki 6.x support until May 2014.

Please see: Version Lifecycle

For information on these releases and future Tiki plans, see http://dev.tiki.org/Roadmap. You can obtain Tiki 9.0 (as well as all other Tiki releases) from http://tiki.org/download.

## The Tiki 9.0 Beta is Here

Rick - 28 May 2012 17:29 GMT-0000

The Beta release of the next generation of Tiki Wiki CMS Groupware is now available. The **Tiki 9.0 Beta** includes many new features and functionality, including:

- Improved batch actions, cron jobs, and token access
- Multiple improvements to calendars, file galleries, maps, and other Tiki features
- Several new plugins
- Improved security and spam protection

Review the [Tiki documentation](#) for details on what's new in Tiki 9.

Tiki Community members are encouraged to download and explore this new release. Issues and suggestions should be reported on the [Tiki Developer site](#). Tiki Administrators are reminded that this release should not be used in production environments.

You can obtain the Beta directly from SourceForge: [http://sourceforge.net/projects/tikiwiki/files/Tiki_9.x_Herbig_Haro/9.0beta/](#). For information on this and future Tiki plans, see [http://dev.tiki.org/Roadmap](#).

## The Tiki Admin Team Welcomes New Members

Rick - 18 May 2012 23:03 GMT-0000

The Tiki Admin Team is proud to announce the nominations of three new members: **Rodrigo Primo**, **Jean-Marc Libs**, and **Jean-François Bilger**. All three are active members of the Tiki Wiki CMS Groupware project and have contributed countless hours to the ongoing development of Tiki. As members of the Tiki Admin Team, they will continue to help shape the future of Tiki.

## Tiki Releases 8.4

ricks99 - 03 May 2012 19:11 GMT-0000

The Tiki Community is proud to announce the release of **Tiki 8.4**. This release, with more than 150 code contribution by eight Tiki Community members, includes several fixes and updates.

Among the new features are:

- Several new, detailed user permissions
- Support for stateful SOAP sessions
- UI enhancements

Refer to http://doc.tiki.org/Tiki8 and the Tiki 8.4 Release Notes for details.

This is the last planned release of the Tiki 8.x branch. Tiki Administrators using the 8.x version are encouraged to upgrade to this latest release, and then to Tiki 9.0 when it become available.

Thank you Egidio Romano (aka EgiX) for reporting a security vulnerability, which is resolved in 8.4

For information on these releases and future Tiki plans, see http://dev.tiki.org/Roadmap. You can obtain Tiki 8.4 (as well as all other Tiki releases) from http://tiki.org/download.

## Tiki Wiki CMS Groupware Updates Tiki 6.7 LTS

Rick - 12 Apr 2012 22:30 GMT-0000

The Tiki Community is proud to announce the release of **Tiki 6.7 LTS** (Long Term support Version). This release includes bug fixes and updates only — there are no new features in this release.

Thank you Egidio Romano (aka EgiX) for reporting a security vulnerability, which is resolved in 6.7

Tiki Administrators using the LTS version are encouraged to upgrade to this latest release. The Tiki 6.x branch will remain the Long Term Support version until the release of Tiki 10, planned for October 2012.

And stay tuned for the first public beta of **Tiki 9.0**, the next generation of Tiki Wiki CMS Groupware, that is expected to be available shortly. This new version contains a host of improvements in multiple areas and several new features. Refer to http://dev.tiki.org/Tiki9 for details.

Tiki 6.7 LTS

For information on these releases and future Tiki plans, see http://dev.tiki.org/Roadmap. You can obtain Tiki 6.7 LTS and Tiki 9.0 beta (as well as all other Tiki releases) from http://tiki.org/download.

## TikiFest + Kaltura: Video development the wiki way

Rick - 09 Apr 2012 11:39 GMT-0000

Members of the Tiki Community and Kaltura Team met just before Kaltura DevConnect 2012 to work on the Kaltura integration with Tiki Wiki CMS Groupware. This co-event, the second for the Tiki and Kaltura communities, was a great success. Over two days of work, team members completed more than 40 updates to the Tiki codebase. These improvements will be included as part of Tiki 10.0.

Some of the improvements include:

- An improved Tiki plugin for embedding Kaltura media

- Improved Kaltura administration, via Tiki
- Configuration the of Kaltura Configuration Wizard (KCW) interface
- and much more.
