

Tiki turns one!!!

marclaporte - 07 Oct 2003 22:06 GMT-0000

What a tremendous first year!!!

I'd like to thank all the contributors for making Tiki a great project and a great community. Special thanks to Luis Argerich who started all this!!

We deserve to be proud of what has been accomplished. And the perspectives for the future are very bright.

A little history

October 7th, 2002: Luis Argerich releases Tiki 0.9 (Spica). During the first 10 weeks, 7(!) Tiki versions are released.

December 2002: Tiki 1.4 documentation is released. (231 pages, fully illustrated). Tiki is described as "a CMS system based on a Wiki"

May 2003: Version 1.6 is rebranded Tiki CMS/Groupware to showcase the "MyTiki" and other groupware features.

June 2003: IRC #tikiwiki chatroom is launched with instant success and spawns a collaboration space & spirit ever since.

July 2003: Tiki is awarded Project of the Month on Sourceforge

August 2003: After weeks of testing, (eating our own DogFood on tikiwiki.org), 4 release candidates and unprecedented collaboration on IRC, Tiki 1.7 is launched.

Current stats about Tiki

top-10 most active projects on Sourceforge

<http://sourceforge.net/top/mostactive.php?type=week>

top-10 best rated app on Freshmeat.

<http://freshmeat.net/stats/#rating>

120 developers on SourceForge:

http://sf.net/project/memberlist.php?group_id=64258

1500+ members on

<http://tikiwiki.org/>

The codebase & the number of contributors is growing:

<http://tikiwiki.sourceforge.net/cvsstats/>

Very active IRC chatroom (Often 20+ people logged in)
