

## A Decade of Tiki!

Rick - 04 Oct 2012 18:39 GMT-0000

It may be hard to believe, but the Tiki Wiki CMS Groupware project was started a decade ago with its first public release on October 9, 2002! From its humble beginnings as a mere wiki, Tiki has grown to become the Free / Libre / Open Source Web Application with the most built-in features. And as the application has grown, so has the community.

Tiki releases: 0.9 through 10.0 ([click to view](#))

Today, there are more than 20,000 registered accounts on the Tiki websites, more than 500 contributors with commit access to the Tiki codebase, and well over 1,000,000 downloads of Tiki!

Happy Birthday to the entire Tiki Community!
