

Security and bug-fix updates: Tiki 17.1, Tiki 16.3, 15.5 and Tiki 12.12 released!

Gary Cunningham-Lee - 25 Sep 2017 23:10 GMT-0000

The Tiki Community has released updates to all supported branches of the Tiki Wiki CMS Groupware project. These updates address several vulnerabilities found in Tiki, as well as bringing miscellaneous bug fixes.

Special thanks to:

- chbi at <https://chbi.eu>
- leon.zhao
- Pradeep Kumar
- Tim Coen of <https://www.curesec.com/>
- xu yue (aka cdx or Xyntax)

for reporting and assisting in verifying fixes for the security issues!

All Tiki website administrators are strongly encouraged to upgrade their sites to the latest Tiki versions: Tiki 17.1, Tiki 16.3, Tiki 15.5 LTS, and Tiki 12.12 LTS.

Visit <https://tiki.org/Download> to get the latest version.

Known issues

Tiki 16.3 contains an unfortunate regression in the installer: Switching the site language is ignored in installer.
