- What can be done with Trackers in a modern environment like Tikiwiki?
 - Whats that mean exactly?

What can be done with Trackers in a modern environment like Tikiwiki?

This idea is about creating dynamic dependency and classification graphs and reports based on tracker inputs and variables using Graphviz and Bayesian modelling linked with Tikiwiki Trackers.

Whats that meanÂ exactly?

- <http://b-course.cs.helsinki.fi/>
 - Check the report
- Tracker

If you have tabular data and are looking for a dependancy model of these variables: This is maybe the simplest form of human readable statistics.
