General Description

The Hotwords feature allows you to make certain words in Wiki pages appear consistently as particular hypertext, i.e., specific **external** links.

Activation

With administratrive privileges click Admin, then click the Features icon. Check the appropriate checkbox for Hotwords and save your changes.

Key Function and sub-features

Typical Uses

They are very useful for creating glossaries.

Note: Take care with your choice of HotWords, especially if they are acronyms. Combinations using a common noun and consonant for HotWords can cause great problems in your links.
