Wiki PluginÂ MOV Description

This plugin plays a quicktime movie in a wiki page (.mpg as well)

Usage

Copy attachment to:

---

lib/wiki-plugins/

MOV Displays a Quicktime Movie on the wiki page:

{MOV(width=>xx,height=>xx, controller=>true|false,autoplay=>true|false,loop=>false|true)}URL to Movie{MOV}

with and **height** optional (default 320 x 240)
controller optional (default true) 16 pix are added to height to show up the contoller
autoplay optional (default true)
loop optional (default false)

alternative you could write

{MOV(movie=>URL to Movie, width=>xx,height=>xx, controller=>true|false,autoplay=>true|false,loop=>false|true)}{MOV}

Example

{MOV()}http://yoursite.org/pub/sample.mov{MOV}

Link .mov .mpg file in fileÂ galleries

You can link .mov .mpg file in file galleries as a plugin in wiki page by using the files' id in file galleries.

First you have to edit the wikiplugin_mov.php

Add "tiki-download_file.php?fileId=" in this line in wikiplugin_mov.php

---

$asetup .= "";

change to

$asetup .= "";

After that you just need to enter fileid of the mov/mpg file instead of file url

---

{MOV(movie=>fileid, width=>xx,height=>xx, controller=>true|false,autoplay=>true|false,loop=>false|true)}{MOV}

- Remember to change back the code if you want to link to file by using url or you can just create another new plugin.
