Upgrade instructions

- backup your tiki files
- backup your tiki database
- get the tiki archive and extract it
- copy files over your existing tiki
- rerun ./setup.sh to make your all file/directory permissions are as needed
- done

Changes since 1.8.2

Bugs known to have been introduced

- PluginSQL with MSSQL stopped working, putting lib/tikidblib.php from 20040402 works again (reported here but in spanish). Not sure if that happens with more databases.

Security

- When an object is deleted, all objects of the same type lose custom permissions. Chealer9 [+]
  Revision 1.373.2.43 of tikilib.php fixes that bug with this diff.

Resolved bugs and misbehaviors

- Articles: Cannot add comment with zero-length body fixed by luci
- Image Galleries: fixed buggy image navigation (it seems there's still some problem with cacheing on tiki-browse_image.php - after reload the navigation links get correct) luci
- Mini-calendar Chealer9
- FAQs : Questions can't be edited (invalid variable value for sort_mode) *Damian*
- MSSQL support in tiki-install *Damian*
- MSSQL tiki.sql file - Still has problems with INDEXs *Damian*
- Made tiki-install IIS friendly *Damian*
- faq_questions, change of error message *Damian*
- tiki-modules, shouldnt be called directly as it gives path disclosure *Damian*
- patched phplayers for directory listing *Damian*
  - worth noting that people should remove the demo files from here for added security !
- Added better horizontal menu support for phplayers *Damian*
  - note: the CSS file needs extra classes which can be found in /lib/phplayers/ sample code files!
- RSS feeds : Display bullets out of page ohertel
- HTML enabled wiki pages : Capital causes many linesohertel
- Search: user input not checked for unwanted chars ohertel
- RSS feed is not per gallery. swayambhu
- Live Support, fixed the JS that was causing it to fail *damian*
- Articles : page number didn't show Chealer9
- Metal themes: Removed hard img links to tikiwiki.org reverted to local img folder instead *Damian*
- tikibot : fixed translation plugin *mose*
- SF BUG #832698: All chart items showing in individual Chart Views *patvdv*. Also changed the templates/tiki-view_chart.tmpl not to show the tiki_chart_items.URL field when it's empty (and avoiding creating an unnecessary URL link)
- since_last_visit_new module: show right link of new forum posts to the post thread (UserPagegmuslera|gmuslera))
- lang NL (Nederlands) now fully up-to-date *patvdv*
- when uploading files in the file gallery the return value if is_uploaded_file() is checked *as6o*
- in the case of file-system storage for file galleries, the on-disk file is removed if the entry isn't added to the db *as6o*
- SF BUG #961082: Wrong navigation/sorting links in Admin Directory > Validate Sites *patvdv*
- fixed double gzip compression causing empty pages or error messages ohertel
- SF BUG #963505: Bug in mod-forums_last_posts ohertel
- SF BUG #952452: Forums : forums_last_posts replying problem ohertel

- SF BUG #926614: Forums : Reads and Replies checkboxes inverted Chealer9
- fixed the highlight plugin behaviour in case of odd chars searched in search engine mose
- SF BUG #965263: article visible even if publishing date is in future ohertel
- switch_lang module for anonymous in certain conf sylvie
- renaming of wiki pages
- SF BUG #941944: Wiki : Cannot rollback page ohertel

Enhancements/changes

- damian.css - a style which uses a horizontal phplayer menu for the basis of its navigation *Damian*
  - See it in action on http://tikigod.org/tiki18/ and please read damian.css for pre-requests!
- Individual images in galleries can now be categorised! *Damian*
- RSS: New 'refresh' button on admin page for external rss feeds ohertel
- SF RFE: 887918 - RSS Feed for directories ohertel
- New module! Top Forum Posters! ModuleTopForumPosters *damian*
  shows avatar, name and number of posts
- New Wikiplugin - {FLASH()} for displaying SWF content in a wiki enabled area. PluginFlash - *damian*
  takes movie, height, width, quality as parameters
- tikibot : now an add content in wikipages using irc hook *mose*
- New Wikiplugin - AGENTINFO --> PluginAgentInfo *damian*
- Template modifications *patvdv*
  - Changed the way individual object/page permisisons are highlighted. Instead of using round brackets '()' now using a separate icon (green coloured key:)
- Added a variable in general admin panel to setup the url of the help website linked to that ? question mark in admin pages mose
- template modifications *patvdv*
  - changed class 'link' to 'linkbut' where appropriate (tiki-pagepermissions, tiki-objectpermissions, tiki-adminusers, tiki-admingroups, tiki-assignuser, tiki-assignpermission)
  - added 'return to gallery' button when editing an image (tiki-edit_image)
  - Added some 'nowraps' in action icon columns and changed the order of some the action icons to standardize (config, edit/delete, perms)
