Bugs

- Shoutbox : Long strings don't wrap on a new line

RFEs

- {SF(aid=>716809,tag=>rfe)}{SF}
- We should try to get parts of WikiSyntax working for Shoutbox (WikiWords (most important of all), links, font modificators, others?)

Competition and standards

List of other products with similar/interesting/related features.

Here I would like to see some "editorial" content. How do our features compare to others?

SmileTag - Just found this on Sourceforge, has some interesting features converting ;) into 😊 and adding mailto: and http: as needed. Stores IP addresses and they are displayed when you hover over the username. - Damian

CVS Doc section

This is where new features being developed and only in CVS are documented. When the CVS becomes RC/official release, the info in the CVS docs is transferred to update the official docs (FeatureXDoc).

Discussion/participation

Looking at our own site, we often see users requesting support. Shoutbox is probably not the good place to do so. It would be useful to display a message (probably on focus) about what should be the Shoutbox's use. Basically, a Shoutbox description that is not always displayed.

- I think I found a quite good (though evident and easy) solution to this. Plone's forms use tooltips to show a message when the field is focused. I guess this could be generalized in Tiki. mose talked about overlib (I don't know what this is, probably some JS thing).
