Developing Multimedia Presentations in Tikiwiki

Description

With the addition of Audio and Video Galleries, admins/editors/users will be able to create and publish full multimedia presentations of all kinds including, interactive lessons and tutorials, internet radio and tv programs, music videos, talking books, etc.

JukeboxDev describes the basic features needed immediately. I am not a programmer, so I need someone to do the PHP, and I will set up the interface and wizards (Galaxia help?) needed to guide users through the process of creating the presentations.

As far as I (colorado) can tell, no other CMS has these features, and these would set us apart and ahead of the competition.

Status/RoadMap

- Where are we?

JukeboxDev has been started

- Where do we want to be?
- Who is working on what? (Priorities/goals/majors issues/roles)

TikiTeam

Who is working here generally? Link UserPage.

Trackers

- Bugs
- RFEs
- tech support
- patches

Competition and standards

List of other products with similar/interesting/related features.

Here I would like to see some "editorial" content. How do our features compare to others?

CVS Doc section

This is where new features being developed and only in CVS are documented. When the CVS becomes RC/official release, the info in the CVS docs is transferred to update the official docs (FeatureXDoc).

Discussion/participation

Where ideas can be exchanged, debated, etc. Interested people can subscribe to the wiki page and/or to these forums as they would a mailing list.
