

Last.fm is connecting people through music, and not just showering people with music. It's sort of a new kind of online radio. A radio that connects you straight with the right music without having to do mind-numbing searches and scrolling endless playlists.

You can read [more about it](#) on [Last.fm](#) site.

A note: LastFM shares accounts with [AudioScrobbler](#) so if you're already using the AudioScrobbler's plugin to upload the info about your favourite music you don't have to register on Last.fm.
