

Table of contents

- What's this about?
- 2013-06-03 Presentation about Natural Language Processing (NLP) in Tiki
- Use Cases
 - Eliminate Duplicates
 - Use Case: "The page you just created may be a duplicate of these"
 - Use Case: "The document you uploaded may be a duplicate of these"
 - Use Case: "Show me the most similar pages that match query X"
 - Find similar or related to a particular interest
 - Use Case: "See also"
 - Use Case: "You might be interested in the following job postings|resume"
 - Use Case: "You might want to meet the following people"
 - Use Case: "People who bought this product also bought these"
 - Use Case: "The product you just purchased is very similar to the following"
 - Use Case: "People who visited this page also visit those"
 - Use Case: "The following people seem to visit|like the same kinds of pages as you"
 - Use Case: "The following groups|pages might want need to meet|reference each other"

- Use Case: "You might want to supplement your keywords with those"
- Use Case: "New content of interest to you has been added"
- Use Case: "The following Tiki sites near you might be of interest to yours"
- Use Case: "Show me some pending bugs that I might be able to fix"
- Use Case: "Which items should I read in my news/RSS feed?"
- Organizing content
 - Use Case: "Split conference participants into tables of 10"
 - Use Case: "Split work to do on this wiki among 15 volunteers"
 - Use Case: "Where should this go?"
- Gisting/Summarising content
 - Use Case: "What are the most frequent questions people ask here?"
 - Use Case: "What NEW questions are people asking?"
 - Use Case: "What do people talk about on this site?"
 - Use Case: "What does this category talk about?"
 - Use Case: "What do people say about X on this site"
 - Use Case: "What major themes were discussed in my interviews"
 - Use Case: "What are people posting on my site during my event"
- Feeling the "mood"
 - Use Case: "Are people in my community happy or unhappy right now?"
 - Use Case: "Which of my customers are most unhappy?"
 - Use Case: "Which of my products are customers most happy/unhappy about?"
 - Use Case: "Show me the most positive/negative things people have to say"

about X"

- Use Case: "Who are the positive/negative forces in my community?"
- Use Case: "Tell me when a conversation needs moderation"

- Infrastructure needed

- More like this (mlt) functionality
- More like THESE functionality
- Automatic clustering algorithms
- Semantic augmentation of content
- Available NLP and IR toolkits
 - NLP and IR kits
 - Usage patterns kits and algorithms

- What to implement first

- Pictures

- Brainstorming on params to apply to each use case
