

Configure User's Files

The screenshot shows a web-based configuration window titled "User files". It contains the following elements:

- A text input field labeled "Quota (Mb)" with the value "30" entered.
- A radio button labeled "Use database to store userfiles:" which is currently selected.
- A radio button labeled "Use a directory to store userfiles:" which is currently unselected.
- A text input field labeled "Path:" next to the unselected directory radio button.
- A button labeled "Change preferences" at the bottom center.
