

Hi, I'm Philippe Cloutier, nickname chealer (or Chealer9 here). I began to use Tiki as administrator for the Ido language community... and I liked it! I contributed to Tiki from 2003 to 2004, before studying computer science.

I came back to Tiki as a freelance software developer and consultant from 2009 to 2012. I worked on the workspaces project, on our Web Deploy package and I cleaned up modules. I helped manage a few releases.

I came back to Tiki as a freelance software developer from 2017 to 2019, working fulltime on the development of Tiki websites used by the provincial government.

Nowadays, I use Tiki for a couple small websites, mainly *Kune ni povos*, my hypopersonal website.

I am a generalist, but I mostly master the backend.
