

))DereDior((aka Helge

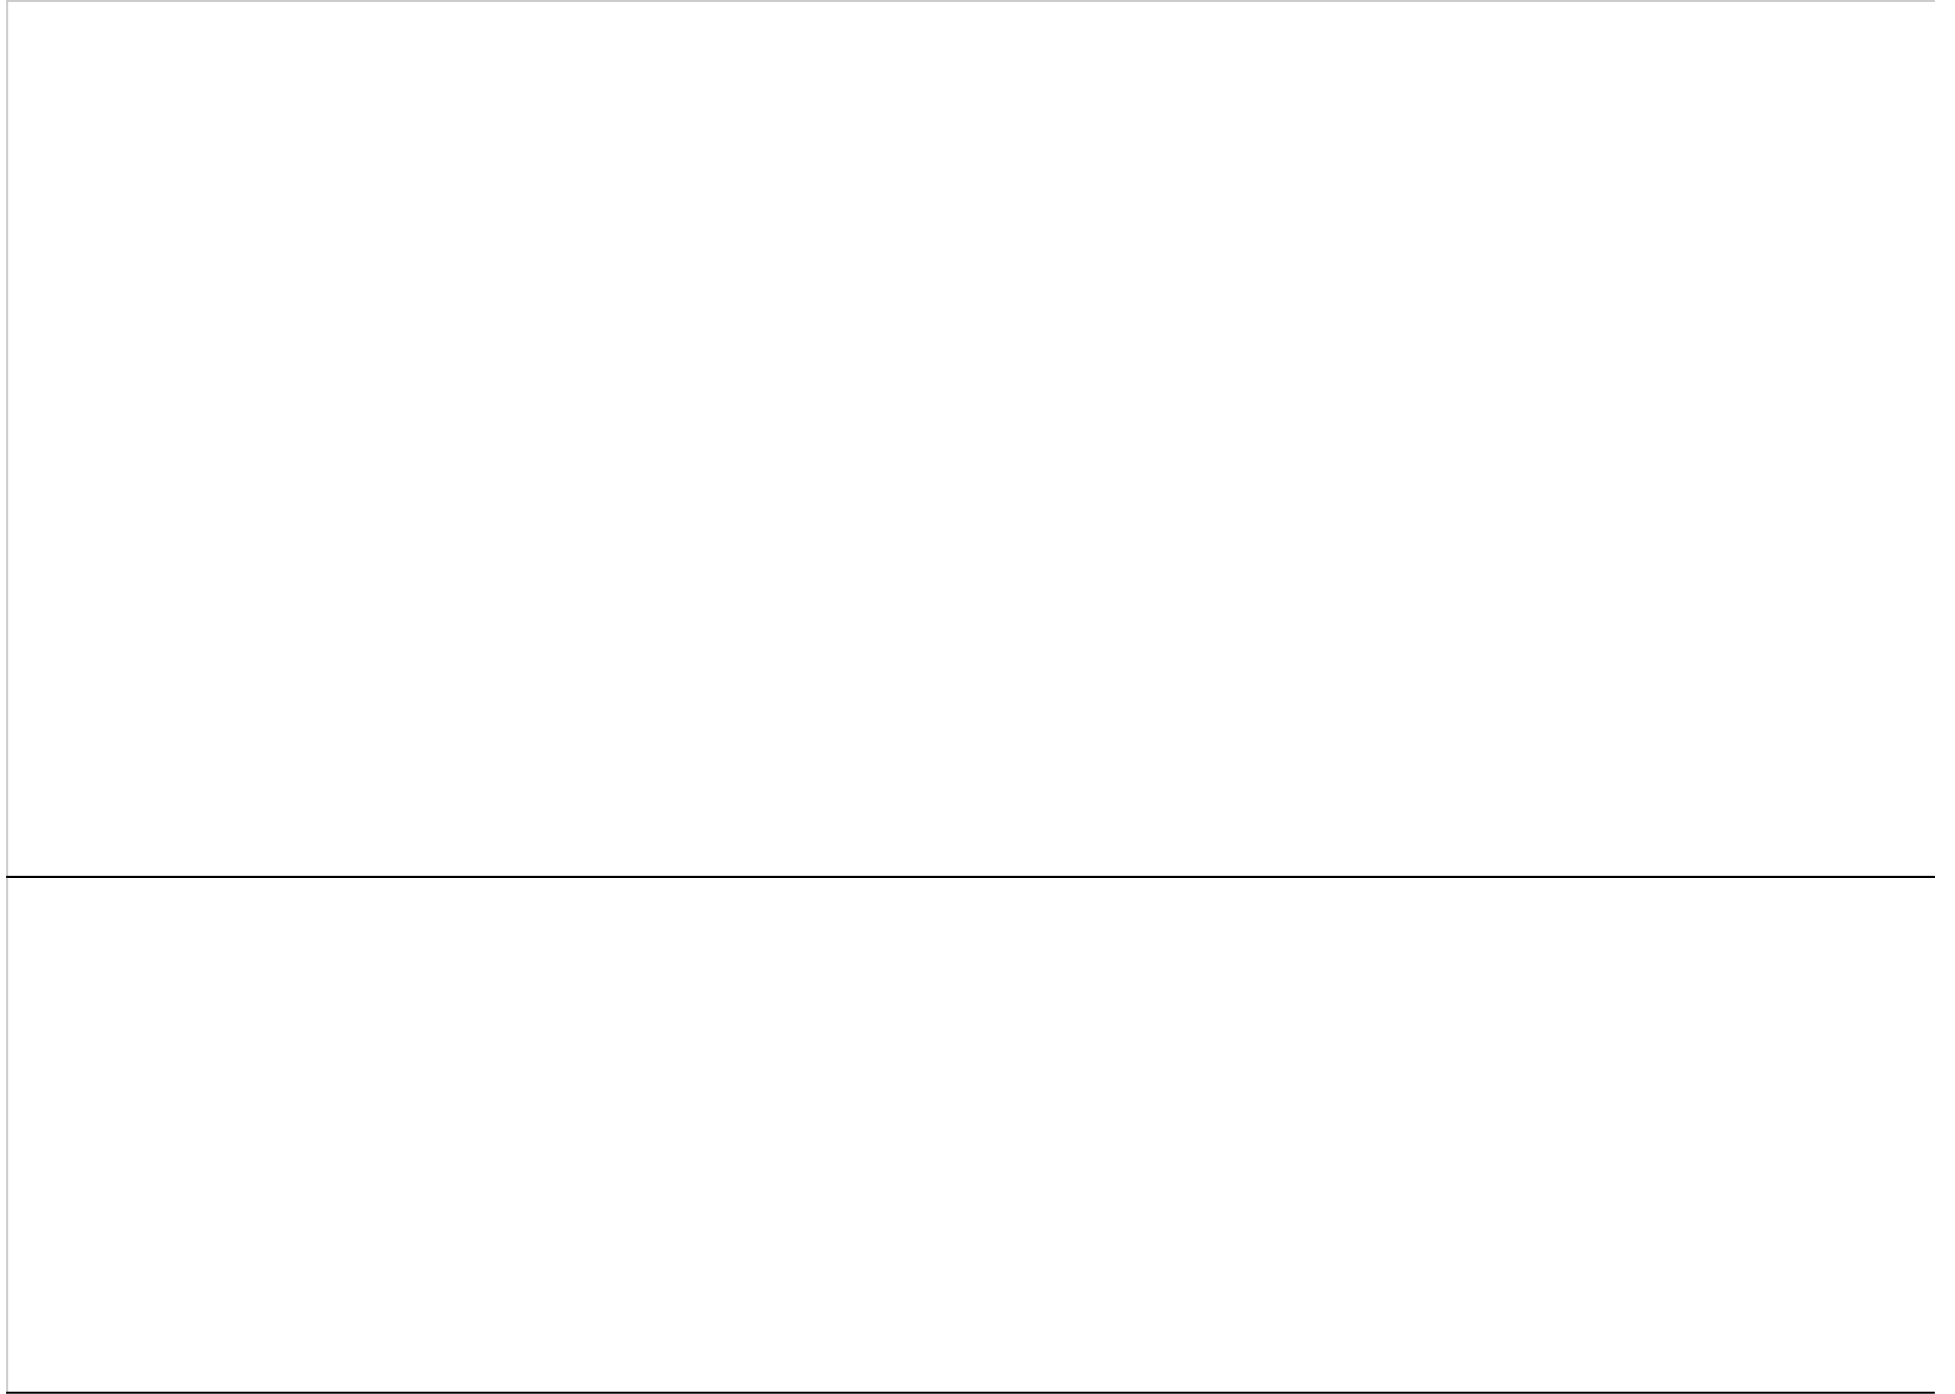

some month before i began to use and test tw.o and - to tell the truth- every day of usage it makes more fun ☒ for me.

Meanwhile i use tw.o for my personal organisation and i plan to use it for some of my own Websites.

my experience was, that only some information about installation and configuration of tikiwiki is available in my native language...☒. So my plan is to translate - and i have already began with this- the excellent wiki documentation of tw.o into german language on http://de.tiki.org/tiki-index_raw.php?page=Dokumentation ☒ Our progress can be traced on [Documentation Status](#)

Everybody is invited to help!....
