

RFC links

- this one
- that one

Thoughts/Ideas

- Should we attempt to port [IMP](#) or
- [SquirrelMail](#) or capitalize on current tiki
- WebMail POP3 code?
 - Dunno

Modifications

- Created new file imap.php
- Added imap_hostname, imap_port, changed pop,port, in tiki.sql
- Added account_type, imap stuff, pop variable rename to replace_webmail_accounts() in lib/webmail/webmaillib.php
- Modified templates/tiki-webmail.tpl to add new imaps fields to form
- Modified tiki-webmail.php [settings](#) section to add new imap fields
