

## RFC links

- this one
- that one

## Thoughts/Ideas

- Should we attempt to port [IMP](#) or
- [SquirrelMail](#) or capitalize on current tiki
- WebMail POP3 code?
  - Dunno

## Modifications

- Created new file imap.php
- Added imap\_hostname, imap\_port, changed pop,port, in tiki.sql
- Added account\_type, imap stuff, pop variable rename to replace\_webmail\_accounts() in lib/webmail/webmaillib.php
- Modified templates/tiki-webmail.tpl to add new imaps fields to form
- Modified tiki-webmail.php [settings](#) section to add new imap fields
