Hi!

I just started using))TikiWiki((as a platform for some general user organizations.

I'm a 20-year software engineering veteran. I don't remember how many languages I can program in or the platforms I can program on. Sadly, PHP isn't one of them so I've got a learning curve ahead of me.

I live in San Diego, California where I am the head of the Software Engineering department of a telecom provider based in the Bay Area.

I can be reached at camhmatt at pacbell dot net
