

Tiki/Mindmeld Roadmap

Phase I: Embedding Mindmeld into Tiki

My plan is to begin by simply embedding Mindmeld into Tiki as a module. This will allow the Tiki folks to start putting solutions into Mindmeld for user and even developer support.

Timeline: Should be finished by October 24

Phase II: Mining Tiki for Answers

After I've embedded, I'll start looking at a database-level integration, so Mindmeld will be able to learn content directly from wikis, forums, articles, and other Tiki modules.

Timeline: End of the year.
