

Rich media

You can see some examples on Macromedia - [Flex](#) .

But no panic, i don't insist to install a 15000 server 😏

I use a flashplayer for streaming music:

```
{FLASH(movie=>/player.swf,quality=>high,height=>100,width=>354)}{FLASH}
```

```
{FLASH(movie=>http://www.runscript.com/tikimovies/player.swf,quality=>high,height=>100,width=>354)}{FLASH}
```

[more info](#) -> [FlashStar Portal - Links](#)

What about parsing some tiki content with [DENG](#) ?
